## **OBJECTIVE**

Networking Engineer with a focus on Cisco and Windows 2000 seeking a part-time or full-time engineering position in the areas of design, planning, implementation, upgrade and maintenance in the Los Angeles or Las Vegas area.

## **QUALIFICATIONS**

CCNA with over 15 years IT experience, primarily in Windows based networks. Extensive experience with OS rollout via RIS and in remote administration. Working experience with Cisco equipment including routers, switches and PIX firewall. In-depth knowledge of RIP, EIGRP, OSPF and IS-IS. Experience with Frame Relay, leased-lines and ISDN (BRI/PRI). LAN experience covers Ethernet, Wireless and Token Ring.

## **EXPERIENCE**

**Network Administrator**                      **Expedia, Inc.**                      2003 to current

Working as a network administrator directly responsible for design and maintenance of a Cisco based network. Directly responsible for all Cruise related systems at the Las Vegas location, shared responsibility for 40 Windows 2000 based servers in Las Vegas NV and Tacoma WS.

### **Accomplishments:**

- ✍ Member of the global Security Committee
- ✍ Implementation of Cisco ACS/TACACS+ in a multi-location environment
- ✍ Directly responsible for design and maintenance work of all networking devices at the Las Vegas NV and Tacoma WS call centers.
- ✍ Supporting an estimated 60 Cisco devices including Routers, firewalls and switches in a multi location, multi-homed network.

My work is split to about 75% networking and 25% server administration. I have direct experience with all devices on our network including 2500, 2600, 3030VPN, 3640, 4000/4500/4700, 515PIX/525PIX 6500 and 7200 series devices. The network topology includes various VLAN's and VPN connections to trusted internal networks as well as VPN connections to vendor networks. The network also supports inbound VPN using multiply 3030 series concentrators with NT authentication. I created various roll out mechanisms for OS installation, patch roll out and software package roll out.

**System Administrator/Engineer    hostmeister.com    1999 to current**

Full-time consultant in the IT industry. Clients range from small retail/office customers to large corporations like Travelcape.com and Expedia.com.

Experience with Windows 2000/XP environments. Skilled in server configuration and hardening with NT4, Windows 2000 and Linux. Experience in setup and initial configuration as well as maintenance and backup/restore for Windows and Linux systems that are directly connected to the internet. Currently operating a mixed environment of Windows 2000 Server (web services, email, remote access and DNS) as well as Linux Redhat 8/9 systems running web services and DNS.

**Accomplishments:**

- ✍ Design and implementation of all systems at hostmeister.com running Windows based and Linux based operating systems for email and web hosting services serving clients in the US and Europe.
- ✍ Working experience with Cisco and most other common small to midrange network equipment.
- ✍ Planning and execution of call center move with 150+ work stations at Expedia.com including managing of sub contractors, work station image creation, roll-out and full documentation.
- ✍ Supporting migration of 100+ work stations from W98 to Win2K at Travelscape.com.
- ✍ Designed and implemented various TCP/IP networks based on client requirements.

Working with a broad range of clients allowed me insight in to companies of all sizes. My main interests are all aspects related to Cisco as well as all security related tasks. I immigrated to the US in 1993 and worked in the US as well as in Canada, South America and Europe. My ability to analyze even complex subjects quickly allows me to troubleshoot systems very effectively.

**EDUCATION & CERTIFICATIONS**

- ✍ Cisco Certifications: CCNA.
- ✍ Cisco courses: Currently preparing for CCNP.

**ADDITIONAL INFORMATION**

- ✍ Fluent in English and German, some French
- ✍ Able to travel, previous work experience in Europe, Asia and South America.
- ✍ Strong character with a solid technical background
- ✍ References available upon request
